Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment filed on October 15, 2004 in which applicant amends claim 31 and responds to the claim rejections. Claims 1-36 are pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Acres et al. (U.S. 5,820,459) in view of IEEE-1394: An Emerging Interconnection System for Future Simulations and Creating One Industry Standard for Manufactures of Electronic Games of Chance.

Acres et al. discloses a system and method for operating gaming devices. The system includes a plurality of gaming devices (22)(24)(26) connected to an associated floor controller (28) over a network. The floor controller(s) can be connected to a host computer (32). The floor controllers can be connected to the gaming machines via a daisy chain configuration as shown in figure 12. Furthermore, Acres discloses any other equivalent interconnection scheme can be used (Figures 1, 12, Column 1, lines 8-32, Column 2, line 59-Column 3, line 18, Column 6, lines 30-41, Column 7, lines 18-55, Column 8, lines 33-43, Column 10, line 20-Column 11, line 20, Column 11, lines 44-54, Column 19, lines 1-64, and Claim 1).

It would have been obvious to one having ordinary skill in the art, at the time of the applicant's invention, to configure a gaming system as instantly claimed by re-configuring the system of Acres utilizing any equivalent interconnection scheme, such as that described in IEEE-

Art Unit: 3713

1394: An Emerging Interconnection System for Future Simulations and desired by the North American Gaming Regulators Association in order to set an industry standard providing flexibility, component configuration, smoother installations, and reduced cost to integrate systems.

Response to Arguments

4. Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection.
